

BIOGRAPHY – DR. RUDOLPH

Lance A. Rudolph, MD, is a board-certified internist in Albuquerque, New Mexico. He is Research Director of New Mexico Clinical Research and Osteoporosis Center. His responsibilities include the development and supervision of the clinical research program, as well as managing an internal medicine practice.

He has over 12 years of experience with clinical trials, and has been principal investigator for a wide variety of studies, including diabetes, arthritis, hypertension, chronic pulmonary disease, asthma, gastrointestinal disorders, headache, osteoporosis and ambulatory infectious diseases. He is certified in bone densitometry by the International Society for Clinical Densitometry. His special interests include bone structure and metabolism, and osteoporosis in persons with disabilities.

He is a member of the American College of Physicians – American Society of Internal Medicine and served on the council of the New Mexico Chapter from 1985 through 1998. He has served as President and Treasurer of New Mexico Medical Group, Inc., a large multi-specialty medical group. While in this group, he co-founded and directed the New Mexico Medical Group Research & Education Foundation, a non-profit foundation to conduct clinical research, physician and patient education.

Dr. Rudolph was raised in Southern California. He earned his undergraduate degree at UCLA, and a medical degree from USC. He served on the staff of the Albuquerque Indian Hospital from 1976 through 1984 and was Medical Director of Outpatient Medicine for 6 years. In 1984, he established a private practice in internal medicine and started a clinical research program. Through his leadership this program has been developed into the New Mexico Clinical Research & Osteoporosis Center, one of the largest independent clinical research facilities in New Mexico.

He is married with 1 son. He enjoys bicycle racing, swimming, and long distance running.
