

# Sjögren's Syndrome

**Sjögren's Syndrome is an autoimmune disorder in which the immune system mistakenly attacks healthy cells in the glands that produce and control moisture in your body.**

If you have been diagnosed with Sjögren's Syndrome or you have moderate to severe symptoms of joint pain or tiredness/fatigue with dry mucous membranes you may be eligible, if you:

- Are female between 18 and 75 years of age.
- Have moderate to severe symptoms associated with Sjögren's Syndrome.

If you or someone you know may be interested in hearing more about this trial don't delay, call today!

**\*Other criteria will apply.**
